Appreciation of the works on display

The thickness of time

Time is a difficult to concretize existence, and often cannot be directly perceived.
 Its passing seems constant, but for individuals,
 it presents a completely different appearance.
 Everyone's age, remaining time in the world,
 and the proportion of one second in their life are all different.
 In this work, I captured portraits of family members using slow shutter speeds,
 and captured their stances in that second at different shutter speeds.
 These portraits are printed on transparent acrylic sheets,
 with different shutter speeds corresponding to varying degrees of transparency.
 By overlaying these acrylic sheets,
 I attempted to depict the thickness of time in life.

Zz ART SPACE is a comprehensive art organisation integrating exhibition projects, public education and art activity planning. Founded in 2023, as a young art space in Xi'an, we will promote the development of youth art with a localised perspective. As a young art space in Xi'an, we will promote the development of youth art from a local perspective. We will try to form an art community through exhibitions, public education, research, planning and activities, and explore the changes in the development of art in different contexts. The space is committed to long-term cooperation with artists, curators and scholars, to discover, organise and establish corresponding academic subjects, to explore the possibilities of art from a contemporary perspective, to promote internal and external exchanges, to uphold the spirit of experimentation and to construct a multi-dimensional ecological model.
